

NEW YORK: Maple Ridge

Maple Ridge Wind Farm is a joint venture between EDP Renewables North America LLC (based in Houston, Texas) and Avangrid Renewables (based in Portland, Oregon). The wind farm area includes the towns of Lowville, Martinsburg, Harrisburg, and Watson in Lewis County, New York on the Tug Hill Plateau, about 75 miles northeast of Syracuse.

Maple Ridge
Wind Farm.

322 MW
ONLINE SINCE 2006

Maple Ridge Wind Farm produces enough clean electricity to power more than **136,000** New York homes¹

Economic Benefits

Maple Ridge represents a capital investment of more than **\$500 million**²

More than **\$80 million** in cumulative payments to local governments through 2016

More than **\$18 million** paid to local landowners through 2016

Created over **458** full-time equivalent jobs during construction and **30** permanent jobs during the life of the project³

\$28.5 million spent within 50 miles of the wind farm through 2016⁴

Median annual salary for a wind technician is **\$51,500**⁵

¹Power generation calculated using a 37% capacity factor. Household consumption based on 2012 EIA Household Data monthly average consumption by state. ²Assumes the average cost of an installed wind farm is \$1.7 million/MW for projects built since 2012 and about \$1.3 million/MW for projects built before 2012, based on US DOE 2012 Wind Technologies Market Report https://www.eia.gov/publications/2012_wind_technologies_market_report. ³Full-time equivalent jobs calculated by dividing number of contractor hours worked during construction by 2080. ⁴Includes vendor spending, property taxes, landowner payments and wages from site jobs. ⁵Based on 2015 wages from Bureau of Labor Statistics <https://www.bls.gov/looh/installation-maintenance-and-repair/mobile-turbine-technicians.htm>. Wind. ⁶Assumes 0.5 gallons of water consumed per kWh of conventional electricity from
